# Experience the Advanced Way to Initiate Specialty Medications.

**iAssist**

# The all-in-one platform for getting your patients started on medication.

iAssist delivers comprehensive, real-time patient onboarding solutions to simplify the process of getting patients access to specialty medications. This advanced platform helps patients access medication faster and gives healthcare providers (HCPs) and staff visibility into the patient journey from diagnosis through prescription in hand.

Simplify a complex system. Get better results from care.

iAssist is a HIPAA-compliant platform that offers e-prescribing for nearly any drug with an NDC. Completely free and cloud-based, iAssist enables your team to perform all steps needed to initiate medication proactively, electronically and all in one place.

## All-in-one Platform Simplifies Specialty Medication Initiation

Our innovative solution simplifies the process of getting patients started on specialty medication and streamlines enrollment for patient support programs – getting your patients access to prescriptions faster.

## Advanced Solutions Streamline Access & Support

Access to e-prescription and advanced benefit information—including plan access requirements and real-time prior authorization capabilities—supports a successful patient journey.

## Actionable Insights Improve Patient Experiences

This interconnected solution provides actionable insights that empower you to support your patients through each step of the initiation process.

| 825,000+ | 107,000+ | 77,000+ |
|---|---|---|
| AssistRx patients served annually | registered HCP users | connected specialty pharmacies |

| 80% | <15 seconds |
|---|---|
| patient lives found | patient coverage returned |

# iAssist delivers the automated solutions that matter most to your practice.

## e-Consent

Electronic capture of patient consent in the office or via email. This reduces missing information sent to patient support programs and additional patient outreach.

## e-Signature

Digital capture and storage of a prescriber's signature allows for easy prescription and form authorization. This improves office efficiency.

## e-Prescribe

Our HIPAA-compliant platform supports e-prescribing with comprehensive prescription details configured by specialty area. This reduces back and forth with specialty pharmacies and dispense turn around times.

## e-Enrollment

Capture of patient and HCP information enables proactive enrollment into patient solutions. This tool ensures patients receive timely access to crucial services that support adherence.

## e-Coverage Solutions

### Advanced Benefit Verification (ABV)

ABV uses just five patient identifiers to pull comprehensive pharmacy benefit coverage information in under 15 seconds. Direct connectivity to payers/PBMs powers real-time delivery of payer/PBM name and type; employer; BIN; PCN; member ID; group ID; relationship; effective and termination dates; deductible amount, remaining and exemptions; patient OOP maximum, minimum and remaining; formulary tier status; drug access restrictions (e.g., PA required, step edit required); and coverage alerts (e.g., age limit, days or supply exceeded).

### e-Medical Benefit Verification (e-MedBV)

Using just five patient identifiers, e-MedBV delivers comprehensive medical benefit information in under 15 seconds for ~70% of patient covered lives. Returns include payer/plan name and type; member ID; group ID; relationship; effective and termination dates; family/individual deductible, year to date, per year and remaining; and family/individual out-of-pocket (OOP), year to date, per year and remaining.

## Advanced Prior Authorization (APA)

Automated solution for proactively submitting PAs to improve processing time from days to minutes. APA returns the appropriate PA form based on a combination of the product and patient's plan for 80%+ of payer-covered lives. Only relevant questions and response options are presented, and fields include validation. APA also facilitates electronic submission of supporting documentation and notes. Payer/PBM decisions include pending, approved, denied or more information requested.

## Financial Assistance Access

Real-time access to financial assistance availability, eligibility and enrollment through a single, automated workflow. This reduces paperwork, enables informed decision making and improves timely patient access to medications.

## Patient Services Access

Through a single, automated solution, providers may proactively and digitally access additional support services for patients to reduce the back-and-forth and get patients access to medications faster.

## Specialty Pharmacy Selection

Connected to 77,000+ pharmacies, this tool allows providers to e-prescribe to the pharmacy of the provider's or patient's choice, specifying patient plan-preferred and in-network pharmacies.

## Status Messaging

Access up-to-date, actionable information from any source connected to the platform (e.g., specialty pharmacy, support programs, payer) to empower informed patient management and support.

Simplify a complex system. Get better results from care.

# Getting started with iAssist is simple.

Visit iAssist.com to create your free account and start improving medication access for your patients. Complete the setup process in less than five minutes by following these steps:

**1** **Register a new account.**
