

A male doctor with short dark hair, wearing a white lab coat over a blue button-down shirt, is looking down at a tablet computer he is holding with both hands. He is standing in a bright, modern clinical or hospital setting with large windows in the background. A dark teal circular graphic element is overlaid on the left side of the image, containing white text. The CoAssist logo is in the bottom left corner.

Experience the true tech-first  
way to drive patient access and  
fulfillment for specialty-lite and  
retail therapies

True tech-first  
patient access and  
fulfillment solution  
improves access,  
visibility & outcomes.

CoAssist is a true tech-first patient access and fulfillment solution for specialty-lite and retail therapies. Triggered from the EHR, automated therapy initiation solutions drive fulfillment to the best affordability option for the patient's prescribed therapy. Real-time Advanced eServices speed access to therapy while our innovative pharmacy model and scalable tech + talent-enabled delivery improve program performance.

This configurable, interoperable solution delivers informed access and improved outcomes through:

#### **Fully automated therapy initiation and fulfillment**

Real-time Advanced eServices kicked off at the point of prescription from the EHR speed access to therapy and increase patient uptake, while delivering differentiated experiences for patients and HCPs.

#### **Patient-focused access to prescribed therapy**

Our innovative pharmacy model, comprised of our selective pharmacy network, a consignment option from CoAssist Pharmacy and free drug from ARx Patient Solutions Pharmacy, drives access at the best fulfillment option for all patient coverage types while supporting the clinical decision and brand goals.

#### **Configurable delivery throughout product lifecycle**

Scalable tech + talent-enabled delivery, combined with legacy technology, pharmacy and patient solutions expertise, enables configurable support to improve treatment outcomes and program performance throughout the product lifecycle.

## Speed access to therapy and increase patient uptake.

Powered by the CoAssist platform, real-time Advanced eServices are triggered at the point of prescription from the EHR to speed access to therapy.

Our proprietary Advanced eServices include eConsent, Advanced Benefit Verification (ABV), Advanced Prior Authorization (APA), Advanced Clinical Documentation (ACD), eEnrollment, Patient Affordability, Patient Services Access, Advanced Clinical Education (ACE) and Status Messaging.

Leveraging direct connectivity to payers, PBMs, electronic PA service providers and other data sources, CoAssist delivers comprehensive patient coverage information in under 15 seconds and PA decisions in minutes. Immediate access to coverage and affordability information, paired with automated services, increase patient uptake, facilitate visibility, improve treatment outcomes and drive differentiated patient and HCP experiences.

## Drive access at the best fulfillment option and support the clinical decision.

Our pharmacy network is comprised of select in-network pharmacies for commercial dispense, CoAssist Pharmacy for consignment dispense and ARx Patient Solutions Pharmacy for free drug dispense.

CoAssist automatically identifies the best fulfillment option for the patient — based on the product and patient's plan — and routes the prescription to the appropriate pharmacy for dispense. As such, CoAssist drives access at the best fulfillment option for all patient coverage types while supporting the clinical decision and brand goals.

## Improve patient outcomes and program performance.

Leveraging agnostic and interoperable technology, CoAssist can integrate with multiple parties involved in the prescription journey. Our modular Advanced eServices can be configured to program needs, including rolling on and off talent-enabled services.

Thus, CoAssist's tech + talent-enabled delivery, combined with legacy technology, pharmacy and patient solutions expertise, enables scalable and configurable support to improve patient treatment outcomes and program performance throughout the product lifecycle.

## Maintain brand equity and deliver differentiated experiences through our private label pharmacy offering.

Life sciences organizations gain a fully branded end-to-end therapy initiation and fulfillment solution using all the features offered by CoAssist.

From your branded pharmacy name in the EHR to patient and HCP communications, life sciences organizations can deploy all CoAssist solutions – under the umbrella of their brand(s).

Configurable Advanced eServices and an innovative pharmacy model not only improve uptake, visibility and outcomes, but also optimize brand equity and program performance throughout the product lifecycle.

**Informed access. Improved outcomes.**

#### **About AssistRx**

AssistRx has engineered the perfect blend of tech + talent to provide an advanced therapy initiation and patient support solution to improve patient uptake, visibility and outcomes. Our solution integrates technology and therapy expertise to advance patient therapy in a more efficient and effective manner—delivering informed touchpoints that simplify a complex system to enable better results for today's patients.
